DIGI - CIVIS

Get involved!

RESULT 1

An online training package for teachers developed to provide educators with the knowledge and skills to teach Digital EU Citizenship. The training includes interactive modules, practical examples, and case studies.
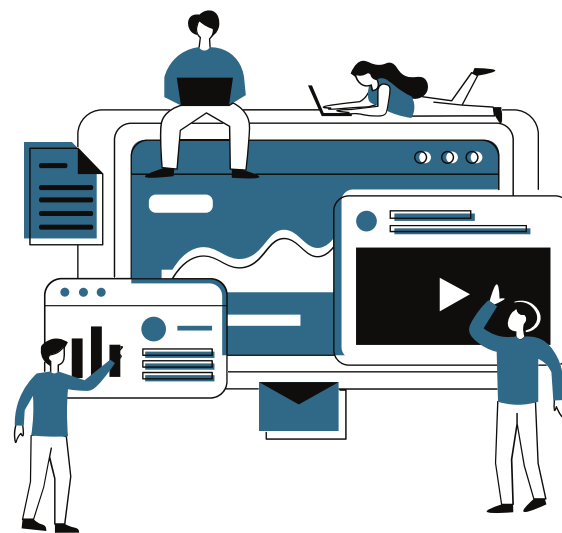

RESULT 2

A set of pedagogical sequences that integrate aspects of digital citizenship into everyday teaching. These sequences provide teachers with practical tools to introduce digital identity and responsible online behavior in the classroom.

RESULT 3

A reality task toolkit designed to help students explore positive attitudes towards digital identity and digital citizenship. It includes real-life tasks, activities, and scenarios that promote critical thinking and responsible online behavior.

The Digi-Civis website offers access to all available modules in multiple languages, along with the pedagogical sequences in English. Whether you're an educator, student, or organization, you can join and start learning or teaching Digital EU Citizenship right away.
