DIGI - CIVIS

The Reality Task Toolkit for digital citizenship

The Reality Task Toolkit is one of the key outcomes of Digi-Civis, offering teachers a powerful tool to develop essential digital citizenship skills in students. It includes a variety of engaging activities, including situational cards, role-play games, and flashcards, designed to teach real-life skills and soft skills related to being online, how to navigate the digital world responsibly, and understanding online rights.

📚 Why is the Reality Task Toolkit essential for teachers and students?

The Reality Task Toolkit stands out due to its innovative approach and practical application in the classroom and beyond. It consists of tools that make learning about digital citizenship interactive, relevant, and engaging for students of all ages. Here's why the RTT is a must-have for digital citizenship education:

- **Develop real-life skills:** Students simulate real situations that help them make informed decisions and act responsibly in digital environments.
- **Integrate soft skills:** It focuses on collaboration, communication, empathy, and ethical decision-making, all within the context of the digital world.
- **Age-appropriate:** The toolkit is designed to be adaptable to students' ages, ensuring that every stage of development is addressed.
- **Aligned with digital citizenship:** It covers key digital citizenship topics, preparing students for their role as responsible digital citizens.

Stay tuned for the launch!

The Reality Task Toolkit will be available soon on the Digi-Civis website. Make sure to check back regularly for updates and follow us on social media for the latest news and announcements!
